SKILLS SUMMARY

- **Languages**:   Java, C++, JavaScript,
- **Frameworks**:   React, Node.js, Express.js
- **Databases**:   MongoDB, MySQL
- **Tools**:   Git, Postman, MS Office, Canva

CERTIFICATIONS

- **The Structured Query Language (SQL)** - University of Colorado Boulder (Coursera), June 2025
- **DSA with Java** - Apna College, May 2025
- **IBM Full Stack Software Developer** - IBM (Coursera), Jan 2025
- **Cloud Infrastructure AI Foundations Associate** - Oracle, Oct 2025

PROJECTS

- **GoCart (Using Next.js, Node.js, Tailwind CSS, Neon, Clerk, Inngest, ImageKit.IO)**:
  * Developed a full-stack, multi-vendor marketplace using Next.js, Tailwind CSS, and Node.js, enabling users to both purchase products and create their own storefronts to sell goods.
  * Engineered a robust backend with a serverless Neon (PostgreSQL) database, integrating Clerk for secure authentication, ImageKit for optimized image handling, and Inngest for reliable background job processing.
  * Github URL: github.com/goCart

- **Apna Video Call (Using React, Node.js, Express.js, MongoDB Atlas, WebRTC, Socket.IO)**:
  * Developed a full-stack **video conferencing** platform enabling real-time video calls, messaging, and authenticated user sessions. Built with the MERN stack (MongoDB, Express.js, React, Node.js), integrated WebRTC and Socket.IO for low-latency communication, and styled using Material-UI for a modern, responsive UI.
  * The application supports features such as room-based video calls, real-time group chat, user registration and login, and secure data handling via JWT and MongoDB Atlas. Deployed the backend and frontend on Render, ensuring live usability and scalability.
  * Github URL: github.com/NexMeet
